roshanpatil2912.rp@gmail.com

Professional Summary

Frontend Developer with 4 years of experience specializing in React.js, React Native, and modern frontend development. Skilled in JavaScript, TypeScript, Redux, Next.js, REST APIs, and building scalable, reusable UI components. Experienced in frontend testing, performance optimization, and component-driven development, with growing expertise in backend development and system design.

Education

Amrita Vishwa Vidyapeetham, Coimbatore | 2023

MCA

S.D.S.M. College, Palghar | 2021

B.Sc (Computer Science)

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3

Frontend: React.js, React Native, Next.js, Expo, Tailwind CSS, Bootstrap, Ant Design

State Management: Redux, Zustand

Testing: Vitest, Test-Driven Development (TDD)

Tools & Platforms: Git, VS Code, Cursor, Builder.io

Other: REST APIs, OAuth, Web Workers, i18n, Agentic AI Workflows

Professional Experience

Associate Software Developer at Nimap Infotech - Mumbai, Maharashtra

Working Period - 12/2023 to Current

- Build reusable UI components and responsive interfaces for client web and mobile applications using React.js, Next.js, React Native, TypeScript, Tailwind CSS, Redux, and Zustand.
- Translate business requirements and design specifications into production-ready frontend features across 6+ client projects.
- Contribute to frontend architecture and state management design, and integrate REST APIs in collaboration with backend, design, and QA teams.

Assistant Software Developer at VAA Technologies - Boisar, Maharashtra

Working Period - 10/2022 to 12/2023

- Developed React.js interfaces and integrated REST APIs while working closely with cross-functional teams to deliver client features.
- Integrated custom React components with Builder.io headless CMS, enabling content editors to reuse them across pages and supported web frameworks.
- Applied Test-Driven Development (TDD) with Vitest to improve code reliability and reduce production bugs by ~30%.

Projects

Novio Credit Card | *React Native*

Description: You specifically mentioned that you migrated the application from Flutter to React Native and started from scratch. That is a strong technical contribution worth highlighting

Roles & Responsibilities :-

- Migrated the Novio credit card app from Flutter to React Native from scratch, and built an AI-assisted development workflow using Claude Code (custom skills, agents and rules) to speed up delivery while keeping the code consistent with the app design system and coding standards.
- Integrated Figma skills so the AI pulled designs directly from Figma and implemented them as React Native screens.
- Configured agents to reference the existing Flutter code for business logic, ensuring functional parity during migration.

- Defined rules restricting the AI to the approved color palette and existing reusable components, preventing design drift and duplicate code.
- Enforced consistent coding practices across AI-generated code so it matched the app's established patterns and structure.
- Reproduced existing UI and user workflows with full functional parity, ensuring a seamless transition for existing users.

DemoKraft AI | *React.js*

Description: A project that provides tools for creating product videos, guides, GIFs, and other product communication content.

Roles & Responsibilities :-

- Developed React.js interfaces for an AI-powered platform focused on product content creation and presentation.
- Built reusable frontend components to support modular, maintainable application interfaces.
- Implemented UI workflows for presenting product features and supporting content creation activities.
- Collaborated on frontend development to translate product requirements into functional, user-focused interfaces

KPMG EAM | *React.js, React Native*

Description: KPMG describes its EAM offering as supporting asset lifecycle monitoring, operational visibility, and asset management.

Roles & Responsibilities :-

- Developed web and mobile interfaces using React.js and React Native for an enterprise asset management application.
- Built reusable UI components to present asset-related information and support asset management workflows.
- Implemented responsive interfaces for consistent user experiences across web and mobile platforms.
- Integrated frontend screens with backend APIs to support data-driven application functionality.

Lugbee | *React Native*

Description: Lugbee helps travelers discover and book secure luggage storage facilities near their location.

Roles & Responsibilities :-

- Developed mobile interfaces for a luggage-storage platform that helps travelers discover nearby storage facilities.
- Built reusable UI components for storage discovery and booking flows, with API integration for data-driven screens.

TopperLearning | *HTML, CSS, JavaScript, SEO*

Description: EdTech platform offering educational content for students from Grades 1–12.

Roles & Responsibilities :-

- Developed and maintained responsive, content-rich web pages using HTML, CSS, and JavaScript.
- Applied SEO best practices to page structure and metadata, improving search engine discoverability. increasing organic traffic by 20%
- Used semantic HTML and mobile-first layouts to deliver consistent content across devices.
